style. safety. variety

These are no ordinary garage doors.

Built for performance and affordability, Models 9100 and 9600 steel doors offer robust features with a variety of options at affordable prices, adding style and curb appeal to your home. Chosen by homeowners for their insulating value, durability, style and safety features.

Ranch panel, Almond finish with Prairie II windows

performance features

The TorqueMaster® Plus counterbalance system seals springs safely inside a steel tube to prevent accidental release of tension that could cause injury. TorqueMaster® Plus features anti-drop safety technology.

Tamper-resistant safety bottom brackets help avoid possible injury by preventing inadvertent loosening when the counterbalance cables are still under tension.

Door panels are engineered with pinch-resistant design to prevent finger injuries while the door is closing.

Models 9100 and 9600 are available with structural reinforcements for use in coastal regions. They meet wind load requirements of the International Building Code, Florida Building Code and Texas Dept. of Insurance.

Wayne Dalton doors feature horizontal integral struts at the top and bottom of door sections which adds rigidity and strength for long life and smooth operation.

Models 9100 and 9600 come with foamed in place polyurethane insulation with an R-value* of 9 for Model 9100 and R-value of 11 for Model 9600. Insulation can improve your home's thermal efficiency, reduce street noise and make the door operate more quietly.
