

MODEL 6000 STEEL CARRIAGE HOUSE DOOR

CARRIAGE
HOUSE
GALLERY
by New England Door®

Once in a while a door series comes along that surpasses all expectations. Our new Steel Carriage House doors are such a product. Consumers can capitalize on the beauty of Carriage House Traditions without the tremendous expense. If you choose this door series to complement your home, you will experience all the advantages of a steel door without the complications associated with the "all wood" design. Each series model will feature unique qualities and benefits while sharing the same aesthetically pleasing face. Upon review of the features and product specifications, you will note the single biggest difference between the steel carriage house doors in the 6000 series is the graduation from a non-insulated product to a high-end, energy efficient model.

**LIFETIME
WARRANTY**

MODEL 6000 STEEL CARRIAGE HOUSE DOOR

Features

- Available with a resilient baked on polyester paint, factory finished in white, almond and sandstone.
- Optional exterior decorative hardware is available in black rustic wrought iron or flat black.
- Four optional window designs from which to select.
- Limited lifetime warranty applies.
- Offers the durability of 24-gauge steel in a pan-type product.
- Inside stiles made of galvanized steel and stile holes are "dimpled" for increased holding power.
- Available in standard strength glass with optional glue chip pattern.
- Individual sections are easily replaced, product specifications will match.

Panel Construction

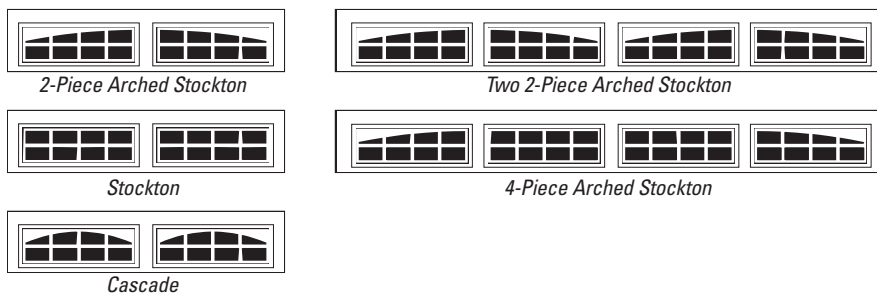

A tongue and groove joint is precisely shaped as the steel passes through the roll former to insure a secure fit. This design strengthens the structural integrity of the door while also enhancing its weather resistant properties. The joint supports the door's overall ability to protect the contents of your garage from the outside elements for years of worry free protection.

Ornamental hinge and handle option provides an enhanced aesthetic appearance.

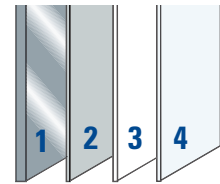

Window Insert Options

Paint System

- 1 Steel
- 2 Galvanizing
- 3 Primer
- 4 Finish coat

Steel used to produce this door is hot dipped galvanized. A .25 mil primer is applied to inhibit rust. A .75 mil layer of finish coat is applied to insure a brilliant, rust free finish.

Color Selections

Optional Glazing Options

Glazing is available in either clear glass or an elegant "Glue Chip" pattern.

Optional Decorative Hardware

Exterior decorative hardware is available as wrought iron or as flat black finish.
